Dear all i-COINERS and all other interested in the i-COIN project. With only days left in the project, I must say it's a bit sadness I'll write this. Since I joined the project it has been a lot of ups and downs, but still it has been a fantastic journey both for me personal and for the municipality of Svenljunga as Lead partner in a EU financed project. I must say it has been fantastic to work with you all and looking forward to work in more EU project. However working together is much more creative then fighting against each other. With these last words I just want to say thanks and a Merry Christmas and a Happy New year.

Jonas Widerström

Responsible for the awareness and dissemination plan

Final meeting, Överlida

The final meeting in Svenljunga, Sweden 27-29th of November 2007 was well carried out.

All project members made a final presentation of what the project had done for them and what will come out of it in the future.

The i-COIN work will definitely not end with this project but will continue to evolve in the future.

A special thanks to all of you in the audience that showed interest in our project at the lectures and presentations.

The i-COIN Toolkit

it is a summary of the whole project, for the whitebook

- What is i-COIN
- Why an i-COIN tool kit
- Project Road Map
- Tools in the tool kit
- Project preparatory discussion
- Project Organization
- Communications information and dissemination
- Interfacing with the municipalities
- A brief checklist for making a questionnaire
- Software and instruction for setting up a portal and adapting the i-COIN platform

Summaries and outputs

In i-COIN Tamsalu municipality started to develop e-services by demand from the citizens. e-Services for better information changing process between citizens and municipality.

The information list, which includes e-mail addresses of citizens and connected people. They received all information about different activities periodically to their mailbox.

All information from the authorities must be available in the Internet. The information must be confirmed (right) All Citizens must have access to same information (at the same time). Anonymous behaviours on the Internet can be a partial risk for the democracy.

From Government to governance:

To increase the dialogue with the citizens and the business sector. The politicians must be an active part and be aware of this channel and be aware of the possibilities and risks. Anonymous behaviours in the Internet is a partial risk for the democracy (Need for) Secure authentication (e-id)

i-COIN platform applications

- by externals
- 2 different applications finally (I - InfoService for officials and II- GIS application)

Usability guidelines

Actually under evaluation of IT administrators in all municipalities of the county

Basis for remake of ProArbeid WEB- site

The Idea is to have a portal which implements already existing content! An practical guide for Usability and Accessibility helps ICT administrators to raise up the quality of there websites It`s easier to interlink a good website than a bad in a portal!

For the SME's there were created a portal were to get collected information regarding SME's business services and EU information.
